For immediate release

### **USAID Tunisia JOBS joins Voix de l'Enfant Monastir to support the empowerment of 100 women in precarious situations.**

The association Voix de l'Enfant Monastir and USAID Tunisia JOBS are launching an empowerment program for 100 women in economically and socially precarious conditions to facilitate their socio-professional reintegration and supporting their financial autonomy.

The project features 3 training courses in tailoring, pastry-making and laundry and will take place in the association's facilities. The training courses will last for a period of 3 months followed by a 3-month internship. 25 women have already been selected for the first wave of trainings.

The collaboration between Voix de l'Enfant Monastir and USAID Tunisia JOBS also includes the setting up of a sales point in Monastir to showcase the products made by women trained during the courses, as well as the acquisition of equipment for the training workshops and the sales point.

This partnership is part of USAID Tunisia JOBS' commitment to support the economic inclusion of Tunisian women and to provide them with business and employment opportunities.
